Associate Software Engineer with hands-on experience designing and building scalable backend and full-stack applications using ASP.NET Core, C#, and RESTful APIs. Proven ability to optimize database performance, implement clean architecture, and deliver production-ready solutions across the full SDLC. Collaborative team player experienced in working with cross-functional teams to ship reliable, high-quality software.

EXPERIENCE

Packaged App Development Associate, Accenture Solutions

April 2024 – March 2026

- Developed and maintained enterprise backend services using ASP.NET Core, C#, and Node.js, supporting insurance policy workflows for US and Canada markets.
- Built and enhanced Angular-based UI components for internal applications, implementing forms, validations, and data-binding to support policy management and administrative workflows.
- Integrated Angular front-end modules with RESTful APIs, ensuring seamless data flow, secure communication, and consistent user experience across applications.
- Optimized REST API calls, LINQ queries, and database interactions, improving application response time by ~30% and overall system performance.
- Implemented Okta-based authentication and role-based authorization, enabling secure access across both backend services and Angular front-end applications.
- Applied clean architecture principles (SOLID, Repository Pattern) across backend and front-end layers, improving maintainability and scalability of the codebase.
- Built feature toggle services to enable controlled feature rollout and configuration-driven activation across backend APIs and Angular UI features.
- Monitored applications using Splunk dashboards, analyzing logs and metrics to quickly identify and resolve production issues.

Java Trainee, Soft Crowd Technologies

January 2022 - March 2022 (Internship)

- Developed backend functionalities using Java for an enterprise-level application, supporting core business logic and data processing.
- Integrated Java backend services with frontend components to enhance system usability and performance.
- Implemented API services and conducted unit testing, ensuring application stability and reliability.

EDUCATION

Bachelor Of Engineering (Computer Engineering) MET's Institute of Engineering, Nashik, Maharashtra, India

2019 – 2023 | CGPA: 8.65/10

Higher Secondary (12th Grade) Z.B. Patil College, Dhule, Maharashtra, India

2017 – 2019 | Percentage: 67%/100

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) – Microsoft

May 2025

Github Copilot– Github

May 2025

Reinvention with Agentic AI – Stanford HAI

December 2025

PROJECT : SMART TASK & WORKFLOW MANAGEMENT SYSTEM

Built a full-stack task & workflow management system that allows teams to create, assign, track, and manage tasks with role-based access, workflow states, and audit logging. the application follows clean architecture, supports jwt authentication, and provides real-time visibility into task progress.

TECH STACK : ASP.NET Core Web API C# Entity Framework Core SQL Server / PostgreSQL RESTful APIs

SKILLS

Programming & Frameworks: C#, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, C++

Frontend: HTML, CSS, JavaScript, TypeScript, Angular

Architecture & SDLC: SDLC, Clean Architecture, SOLID Principles, Repository Pattern, MVC Architecture, RESTful API Design, Microservices Fundamentals

Architecture & Concepts: RESTful API Development, SOLID Principles, Repository Pattern, Debugging

Databases & ORM: Entity Framework Core, SQL Server, PostgreSQL, LINQ

DevOps & Tools: Jenkins, CI/CD Pipelines, Elastic Kubernetes Service (EKS), Docker (basic), AWS (fundamentals), Azure (fundamentals)

Security: Authentication & Authorization, Okta (OIDC, RBAC), Secure API Design

Testing & Debugging: Unit Testing, Debugging, Performance Optimization, Production Support

Collaboration Tools: GitHub, GitHub Copilot, Postman, Splunk, Jira, Confluence, Microsoft Office

AI Tech: Generative AI, Agentic AI

Professional Strengths: Backend Development, Full-Stack Collaboration, API Design, Production Support, Performance Optimization, Secure Application Development

Learning & Development: Continuous upskilling in .NET ecosystem, cloud-native development, Angular, and modern software architecture patterns

Interests: Emerging Technologies, Problem Solving, Travelling, Music
